**POLICIES
AND
PROCEDURES MANUAL
PROVISIONING ALLOWANCE, AND FITTING OUT SUPPORT
(PAFOS)**

DISTRIBUTION STATEMENT (C). DISTRIBUTION AUTHORIZED TO U.S. GOVERNMENT AGENCIES AND THEIR CONTRACTORS; ADMINISTRATIVE AND OPERATIONAL USE, 1 FEB 1990. OTHER REQUESTS SHALL BE REFERRED TO COMNAVSEA, (SEA 041)

PUBLISHED BY DIRECTION OF THE COMMANDER, NAVAL SEA SYSTEMS COMMAND

9090-1500
NAVSEA TECHNICAL SPECIFICATION CERTIFICATION

APPLICABILITY

This certification sheet is to be used by all activities who prepare NAVSEA technical specification (except NAVSEA 08 AND Navy SWOP). This sheet will be included in the delivery or submission of all final manuals (new manuals, change packages, and revisions) and shall remain with the manual until disposal (insert behind "Record of Changes" pages).

TECHNICAL SPECIFICATION IDENTIFICATION

- Tech. Specification Type (check one): New ___ Change X Revision ___
- Tech. Specification (or change) Number: 9090-1500
- Amplifying Numbers/Letters: Change ___ Rev ___ Vol ___ Part ___
Book ___ Chapter ___ Other ___
- Tech. Specification Title: Policies and Procedures Manual, Navy Provisioning Allowance, and Fitting Out Support
- Tech. Specification (or change/revision) Date: Change C 17 November 1997

CERTIFICATION

This technical specification is hereby approved and certified to be technically accurate, complete and current and to conform to approved NAVSEA Technical Specification, Standards and Quality Assurance requirements.

TECHNICAL MANUAL APPROVAL SIGNATURES

NAVSEA TECHNICAL SPECIFICATION

FOREWORD

**PROVISIONING, ALLOWANCE, AND
FITTING OUT SUPPORT (PAFOS) MANUAL**

In the early 1990s, a joint NAVSEA/NAVSUP Process Action Team (PAT) was formed to evaluate the process used to provision new construction ships. Policy and procedural guidance was one of the areas that was evaluated by the PAT. More specifically, they asked several questions for each functional area:

1. Does policy exist for a given area?
2. Is the policy adequate?
3. Is the policy being followed?

It became apparent that there were vast quantities of policy and procedure documents promulgated to cover the Provisioning and Allowance processes. Various activities were aware of some of the documents, but often personnel were not aware of the full range of documents covering aspects of the process. Additionally, numerous personnel stated that while the various policy and procedural documents are adequate as references for a journeyman, they are difficult for the newer employee to understand.

Based on the above, the PAT recommended development of a Provisioning, Allowance, and Fitting Out Support (PAFOS) document that would be a one-stop provisioning and allowance encyclopedia covering all the relevant procedural information. Subsequently, it was decided that it would be even more beneficial if the single source would also include the relevant NAVSEA policy instructions. In this fashion, several policy instructions could be superseded by a single authoritative document containing all of the policy surrounding the Provisioning and Allowance processes. In order to use the document at the working level, it is being developed as both a policy document and a working level handbook. This single document will contain all of the requisite policy guidance and detailed procedural "how to" information.

Due to the complexities of the information being documented in this single PAFOS Technical Specification, each chapter is being developed and issued independently. Subsequent chapters will be issued as changes to the basic manual until all of the chapters have been issued.

This increment includes the Table of Contents for the entire manual to show which topics will be covered; Chapter 4, "Provisioning;" Chapter 5, "Interim Supply Support". Chapter 1, "Supply Support Overview;" Chapter 2, "Readiness Based Sparing;" Chapter 3, "Programming and Budgeting;" Chapter 7, "Ship

NAVSEA TECHNICAL SPECIFICATION

Configuration and Logistics Support Information System and the Allowance Process;" and Chapter 8, "Allowance Update and Maintenance;" and Chapter 9, "Installation and Checkout Material" have been previously issued.

The Deputy Commander for Nuclear Propulsion, SEA 08, is responsible for all technical matters pertaining to nuclear propulsion of U.S. Navy ships, including all aspects of integration of the nuclear plant into the ship's systems. Nothing in this manual detracts in any way from these responsibilities.
